Academic/Professional Background. Degree in Chemistry with honors in 2010 (9.44/10, "Premio Extraordinario Fin de Carrera") and cum laude PhD in Chemistry in 2015 (International Mention, "Premio Extraordinario de Doctorado") at University of Huelva (Spain). Along my scientific career, I have been recipient of 7 pre- and postdoctoral grants funded by some of the most competitive Spanish programs for training and recruiting excellence researchers, securing ca. 650k €. During my predoctoral stage, I obtained 4 grants for initiation in research ("Beca de Colaboración" - MEC) and for completing my PhD studies (FPI & FPU). Then, I moved to University of Barcelona under the "Juan de la Cierva" post-doctoral program (JdC-F, 2017-2019; JdC-I, 2020-2021). In 2022, I joined Instituto de Investigación e Innovación Biomédica de Cádiz (INiBICA) under the "Miguel Servet" program. Currently, I am the Principal Investigator of the "Metabolomics & Bioanalysis" research group at INiBICA.

Scientific Activity. My research interests are focused on the development of state-of-the-art omics approaches (i.e., metabolomics & metallomics) and further application in biomedicine, nutrition, and food science. In particular, I have contributed to the development of bioanalytical key methods employed worldwide for characterizing the role of the gut microbiota, nutrition, and other sources of exposure (i.e., the exposome) in health status, and to unravel the influence of interindividual variability factors in the context of precision medicine. Using these methods in population-based cohorts, clinical trials, and animal models/cell lines, I have great experience in investigating the molecular mechanisms and risk factors behind the onset and progression of a variety of cardiometabolic and neurological diseases. Despite my young career age, I am an author of 106 JCR articles (27 D1, 71 Q1), 13 book chapters, and editor of 3 books. Active participation in scientific conferences (82/58 contributions in International/National conferences). Researcher in 19 International Projects (JPI-HDHL, EIT-Health, COST) and 29 National Projects (MCIN, ISCIII) funded through competitive calls, and in 7 R&D contracts with public and private entities. Recognized among the most influential researchers according to the "World's Top 2% Scientists" ranking (Stanford University) since 2020. Quality Indicators: h-index: 34; Total cites: 3508 (Scopus).

Transfer / Valorization Activity. Author of one Utility Model (Oficina Española de Patentes y Marcas), co-developer of two open-access software tools (FOBI, POMA), and coauthor of a business plan in the framework of an EIT-Health project. In the context of the Responsible Research and Innovation (RRI) initiative, I have also transferred my research to the overall society by participating in dissemination events ("European Researchers' Night", "Semana de la Ciencia"), in the form of interviews in communication media (Fundación Descubre), and scientific dissemination articles.

Mobility / International Activity. Researcher in 19 International Projects (PI in COST Action CA21139), co-PI of one R&D EU contract, and member of various cooperation networks (COST, MetaboRed, RICORS-SAMID). Furthermore, I have conducted 9 research stays at national and international prestigious centers (e.g., Aberystwyth

University, Chalmers University of Technology, CEMBIO). Because of this collaborative experience, I have coauthored 41 publications with international colleagues.

Leadership. My leadership is reflected in the authorship of most of my scientific production as the first (55) or senior/corresponding (55) author, and the direction of 3 Doctoral Thesis (in progress), 19 “End-of-Master”, 29 “End-of-Course”, and 3 Erasmus+ projects. Furthermore, I have been the PI of 5 National Projects, 2 R&D contracts, and Management Committee Member of one COST Action (secured >600k €). In this sense, I have also demonstrated my ability to attract resources for hiring (pre/postdoctoral researchers) and for supporting my research activities (open access, mobility) (ca. 400k €). Because of my expertise, I have been invited to be a speaker in scientific conferences, member of 9 editorial boards (BMC Med, JPA, Antioxidants), reviewer/editor for JCR journals (>150/>40), and project evaluator for competitive funding entities. Moreover, I am recipient of multiple prizes/mentions: BBA Rising Star 2024, Foods Young Investigator 2023, Investigador Joven FEXP-UHU 2021, JAFC Article of the Year 2021, Joven Investigador GRASEQA 2016.

Teaching. Active participation in university theoretical/practical teaching from 2012 to date (>700 h, complying with incompatibility limitations established by R+D scholarships I obtained), 5 Teaching Innovation Projects, teaching training (>200 h), and divulgation activities.
