Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

Research interests: Geochronology, Cosmogenic Isotopes, Numerical Modeling, Earth Surface Processes, Glacial Geomorphology, Tectonic Geomorphology.

BSc (Hons) in Geology by the University of Zaragoza in 2002, I got my PhD in Earth Sciences by the Universities of Barcelona and Aix-Marseille III in 2008. During this time, I participated in the installation of the **first laboratory of terrestrial cosmogenic isotopes in Spain** (Laboratori de Cosmonúclids Terrestres, UB). Several stays in France and the United States allowed me to incorporate the latest chemical and numerical techniques in the new laboratory.

After my PhD, I worked for the Topo-Iberia project in the Barcelona laboratory and the new ASTER acceleration spectrometer (CEREGE), where I learned how to interpret acceleration spectrometry data (AMS raw data) and master rock-to-age data reduction.

Since 2011, I am a **researcher and laboratory manager** at the Cosmogenic Isotope Analysis Facility (CIAF, recently renamed as NEIF-Cosmo), within the Scottish Universities Environmental Research Centre (SUERC, Scotland). In this position, I lead the development of **new chemical protocols** (e.g. routine ^{10}Be analysis of olivine: Carracedo et al. 2019), standard materials (e.g. preparing a low ^{10}Be carrier from phenakite that was distributed internationally), **new numerical models** (e.g. calculators that integrate stable and radioactive cosmonuclides: Rodés, 2021), **and new applications** (e.g. agriculture: Rodés & Evans, 2020) that have demonstrably shaped the discipline internationally. I do this by **creating numerical and statistical tools (in MATLAB, Bash and other languages) to integrate geochemical data into meaningful Surface-process models**.

In addition to my research activity, I manage the day-to-day operation of sample preparation at the Cosmo laboratories (mineral separation, ^{10}Be - ^{26}Al , ICP-OES, and ^{36}Cl laboratories). This requires significant management responsibility for 1 PDRA and 2 technicians. Typically, **10 competitive research projects** are allocated to the Facility **every year**, which require ~250 AMS analyses and supervision of 3 to 5 students and post-doctoral researchers through the **CIAF, SUERC & NEIF-Cosmo student training programs**. I provide support to PIs during the proposal design, writing, and submission stage, and contribute significantly to joint publications.

I also designed a **numerical modelling course for Geologists and Geochemists**, which I started teaching in 2019. This has allowed me to position myself, not only as an international expert in landscape geochronology, but also as a trainer of researchers at the European level. My role as a geochronologist is key to the success of the projects I take part in, focusing my research towards technical and analytical advances. This is reflected in a high rate of scientific production and award generation. **The sum of funding allocated to competitive and non-competitive R&D&I projects and contracts in which I have participated exceeds €10M, of which I have directly generated €140k.**

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

Participation in projects & contracts:

- 9 R&D projects funded through competitive calls (total 5.7M€, **95k€ as PI of 1 project**)
- 7 R&D contracts (total 5.3M€, **50k€ as PI of 4 contracts**)

Publication metrics (Scopus, updated 19/07/2021):

Publications in Web of Science: 42
Average citations per item: 18.6
Sum of times cited: 783
Average citations per year: 52.2
H-index: 16
Average citations per year (2016-2020): 89.8
Publications Q1 (JCR): 25
Publications Q1 (SJR): 32

Invited speaker:

- Seminar at the School of Geography, Earth & Environmental Sciences, University of Plymouth, 2012.
- ESF EARTHTIME-EU meeting, CENIEH, 2013.
- Scottish Workshop for Cosmogenic Practitioners, University of Edinburgh, 2014.
- University of Glasgow-São Paulo State University (UoG-UNESP) Geoscience Research Symposium, 2015.
- Seminar at the State Key Laboratory of Environmental Geochemistry. Institute Of Geochemistry, Chinese Academy of Sciences (SKLEG), Guiyang, P. R. China, 2019.

Advisor on commissioning new laboratories in UNESP (Brazil), CENIEH (Spain), Guiyang (China), iThemba LABS (South Africa), CISPAC (Spain).

Regularly asked to **review** CIAF & NEIF **project applications** and manuscripts in **international journals** (e.g. Nature, Earth and Planetary Science Letters, Geology, Quaternary Geochronology) and member of the **editorial board of Geosciences** Journal (MDPI).

Secretary of the **CIAF Steering Committee** between 2012 and 2018.

Currently **co-directing a PhD student** at the University of Edinburgh.

Convener. Novel applications and technique developments of cosmogenic nuclides (GM2.12). EGU General Assembly, 2021.

Topic editor of Geosciences special Issue “Cutting Edge Earth Sciences: Three Decades of Cosmogenic Nuclides”

Accreditations:

AQU-Catalunya: Lector i Acreditació de Recerca (Agregat).

ANECA: Profesor Ayudante Doctor, Profesor Contratado Doctor y P. de Universidad Privada.

R&D management and participation in scientific committees

Scientific, technical and/or assessment committees

Committee title: Cosmogenic Isotope Analysis Facility Steering Committee
Primary (UNESCO code): 250304 - Geochronology and radio isotopes
Secondary (UNESCO code): 250600 - Geology
Tertiary (UNESCO code): 250607 - Geomorphology
Affiliation entity: Natural Environment Research Council
Type of entity: Public Research Body
City affiliation entity: United Kingdom
Start-End date: 01/06/2012 - 31/12/2018

Organization of R&D activities

Title of the activity: Cosmo2020-Scotland
Type of activity: Conference
Convening entity: University of Edinburgh
City convening entity: Edimburgo, Eastern Scotland, United Kingdom
Start-End date: 02/06/2022 - 05/06/2022
Geographical area: Non EU International
Type of entity: University
Duration: 3 days

R&D management

Name of the activity: Cosmogenic Isotope Analysis Facility
Type of management: Management of R&D&I actions and projects
Performed tasks: Laboratory Manager
Entity: Scottish Universities Environmental Research Centre
Type of entity: University Centres and Structures and Associated Bodies
Start date: 01/06/2011
Duration: 8 years - 6 months

Other achievements

Stays in public or private R&D centres

- Entity:** Chinese Academy of Sciences
Faculty, institute or centre: Institute Of Geochemistry
City of entity: Guiyang, China
Start-End date: 19/05/2019 - 02/06/2019
Goals of the stay: Guest
Provable tasks: Campaña de recogida de muestras geológicas. Terrazas del río Yangtzé.
Type of entity: University Research Institute
Duration: 14 days
- Entity:** University of Edinburgh
Faculty, institute or centre: School of GeoSciences
City of entity: Edinburgh, United Kingdom
Start-End date: 2015 - 2016
Type of entity: University
Duration: 4 months

Goals of the stay: Contracted
