Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

I have a postdoc position in fisheries economy in the University of Santiago de Compostela and a PhD in marine biology and aquaculture from the University of A Coruña. I am also professional diver and technician in aquaculture. I am currently finishing a second PhD in fisheries economics in the international campus of excellence Campus do Mar.

My research focus on the integrated management of coastal socioecological systems, fisheries management, sustainability, resilience and conservation of marine biodiversity and other ecosystem services. Research on coastal fisheries, including recreational, is a central theme of my scientific career. I am specialist in the use of new technology for the research of marine populations such as ultrasonic telemetry, remote underwater cameras and ROVs. In addition, I develop and use different methodologies of social work, particularly, anthropological tools for collecting and processing local knowledge of fishers. Furthermore, I am familiar with different economic valuation methods and techniques.

As part of my research activities, I have published one book and three chapters, 20 articles in scientific journals (H index of 10), more than 40 outreach and technical reports and authored 36 contributions to national and international conferences. I am also a member of three ICES Working Groups: on Recreational Fisheries Surveys, on Resilience and Marine Ecosystem Services, and on SOCIAL indicators, and of the editorial board of the international journals Animal Biotelemetry of BioMed Central, and Marine Affairs and Policy, a specialty of Frontiers in Marine Science.

I am currently leading the recently created Working Group in Marine Recreational Fisheries of Spain, integrated by the main research centres with interest in recreational fisheries of Spain, different public administrations and main stakeholders. In 2018 I co-organized the first International Symposium on Marine Recreational Fisheries (ISMAREF 2018), attended by scientists from several countries, members of different Spanish and European public administrations, representatives of recreational and professional fishers, business consortia related to recreational fishing and navigation, and members of environmental NGOs.

I made 13 R&D stays in national and international research centres invited by leading scientists in different fields, including IGB and Humboldt University in Germany, CEFAS in the UK, Murdoch University in Western Australia, Federal University of Paraíba in Brazil and Charles Darwin Research Station in the Galapagos Islands of Ecuador.

I participated in 37 national and international research projects and I am currently employed in the Department of Applied Economics of the University of Santiago de Compostela.

I have been lecturer of the subject Conservation Biology included in the Master in Marine Biology of the Universities of A Coruña, Santiago de Compostela and Vigo (2003-2016), where I have supervised one Master Thesis, and I am currently supervising two PhD thesis.

During my career I have worked as a researcher in the Universities of A Coruña and Santiago de Compostela, in the private research Centre of Underwater Research of Santiago de Compostela, as aquarist technician in the Aquarium Finisterrae of A Coruña and as an aquaculture technician in an international aquaculture corporation. In addition, I have founded a university spin-off developing sustainable and innovative management of natural resources.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

Supervisor of two PhD thesis currently in progress. Articles in ORCID: 28. Articles in Q1: 9. Articles in Web of Science: 27, sum of citations: 158 average citations per year: 15.8, H-index: 8. Articles in Google Scholar: 38, sum of citations: 293, H-index: 10. Articles in Scopus: 18, sum of citations: 202, H-index: 9. Review to publication ratio: 0.3:1
