## Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

My primary lines of research are in health policies. In particular, I focus on the issue of decision-making in deceased organ procurement policies, both conceptually and empirically.

On the one hand, I have explored consent policies for deceased organ donation with regard to:

- (a) individual autonomy and presumed consent policies, and
- (b) the role played by the family in the decision-making process.

On the other hand, I have analysed the issue of death determination with regard to:

- (c) the criteria for determining death and professionals' attitudes, and
- (d) the role of patients and families, if any, in this decision.

In 2006, I started exploring the bioethical controversy around brain death, with David Rodríguez-Arias and Stuart Youngner, by addressing the issue of pluralism in the definition of death. Later on, my PhD studies at the Autonomous University of Madrid (2015-2017), under the supervision of Jesús Vega, focused on the concept of function in biology. This work would be seminal for designing a new, epistemological approach to death criteria based on the analysis of the “cessation of functions”. From 2019, with Anne DalleAve and James Bernat, I started developing this approach in a paper in the *Journal of Medicine & Philosophy* (in press) and a research project.

Simultaneously, from 2016, I started research on consent policies for deceased organ donation with Janet Delgado and David Rodríguez-Arias at the University of Granada. I led a systematic review with members of European Society for Organ Transplantation. This review revealed knowledge gaps and conceptual confusions with regard to the role of the family. I helped develop a conceptual framework to address these confusions and we launched two surveys based on it to fill the gaps. Then, we proposed and tested indicators to assess the governance quality of organ donation policies using data from these surveys. Besides, with a team of jurists, I designed a framework to review European countries' laws with regard to individual and family consent, and I also participated in exploring the social and ethical acceptability of organ conscription policies. I have also contributed to the distinction between altruism and solidarity as a basis for organ donation policies. I am currently involved in a conceptual clarification of trust in the context of organ donation and transplantation.

## General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

Since I am a PhD, I have published **22 articles** and 2 book chapters. (Total: 28 articles and 7 chapters). A majority (75%, 21/28) are published in the first quartile (Q1) of journals indexed by the Web of Science (JCR, JCI), Scopus (CiteScore, SJR), and/or CIRC databases. This proportion rises to 100% (8/8) of the articles for which I am the first author since 2019. In total, I am the 1st author of 12 articles, 2nd author of 5 and senior author of 2.

- 1 **Guest co-editor** of a peer reviewed scientific journal (Dilemata)
- 7 Book chapters
- 28 Articles in peer-reviewed journals: Q1=19; Q2=3; Q3=2; Q4=1

Currently, I am the **Principal Investigator (PI)** of a research project on death determination funded by the Ministry of Science (Plan nacional de I+D+i) with a team of 18 researchers, with world-renowned authors in the field, and 4 doctoral students. Previously, I obtained **two competitive projects as co-PI** and I participated in writing the proposals for two successful EU H2020 projects.

- **1 National project as PI** (MICINN PID2020-119717GA-I00); 17,000€
- 2 National projects as **co-PI** (Pluralismo y Muerte; PACIS); Total: 27,000 €.
- 3 National and international projects (INEDyTO, ISSATO, RESPONSE); 115,000 €
- **4 European projects** (TTV Guide TX, HADRIAN, ETHICSWEB, EULABOR); **15.4 M €**

**Other activities and achievements.** I obtained a "Juan de la Cierva - Formación" postdoctoral fellowship at the University of Granada in 2018; a Junta de Andalucía postdoctoral fellowship at the Institute of Advanced Social Studies (IESA-CSIC) in 2021; and a "Ramón y Cajal" postdoctoral fellowship at the University of Granada in 2024. I obtained a R3 certificate by the Spanish government in 2023. I co-organised several international conferences and an annual spring break bioethics course for postgraduate students from Case Western Reserve University, USA. I am an active member of the Public Issues Working Group of ELPAT (Ethical, Legal and Psychosocial Aspects of Transplantation), a division of ESOT (European Society for Organ Transplantation). I have also published on the ethics of human embryo research, the ethics of automated vehicles, and the ontology of disease. I was guest co-editor of a special issue of Dilemata (num. 23, 2017) on the ethics of organ donation and transplantation. I am an academic editor for PLoS One and for Humanities and Social Sciences Communications.
